

August 19, 1970

Dear

There has been some industry interest in obtaining quarterly or semi-annual statistics on U. S. exports by company. It is suggested that the information be broken down by both brand and type as well as specific companies or areas, i.e. South America, Central America, Europe, etc. as a further discussion, a separate line would relate to U. S. stocks and futures.

It is doubtful whether all of this would be published publicly but some part of it would probably be used in my quarterly review indicating the trends of the various major brands.

Please let me know if this project is of interest to you.

Sincerely yours,

John C. Maxwell, Jr.

MEMORANDUM

yellow
Dutra
June 1, 1979

TO: D. S. JOHNSTON
FROM: E. T. Parrack
SUBJECT: Issues Pending

This memo summarizes the status of topics you have asked us to address.

I. TRADING AND SALES ANALYSIS

Each brand currently uses Trading Area data to address specific issues like Rich Lights media spending, RALEIGH market ranking for local support, BELAIR's evaluation of year-to-date performance for Pinehurst discussion. There is not yet a formal, periodic analysis conducted by each brand. To develop such a format, BELAIR has conducted a sales performance analysis. It will be available for your review after Pinehurst. If acceptable, we will recommend:

- 1) Adoption for all brands
- 2) Establishment of an MIA priority so the data is available in a usable, manipulatable form.

Currently, the chief obstacle to periodic sales analysis is time required: except when specific questions arise, commitment of a man-week per brand per quarter is excessive.

II. GAS COPY

To provide a point of view by brand, we will pursue the following sequence:

1. Schedule presentation of "Proactive Gas Study" to McCann, PKG.
2. Obtain Agency P.O.V. gas copy by brand.

We will set up Step I as soon after Pinehurst as possible. In our judgment, Step II should take four to six weeks after the presentation. You should be aware of two key assumptions we will make:

1. "Gas" concern will be an issue to consumers. The gas in question will be C.O. "Reassurance" will be assurance that the brand is relatively as low in gas as it is in 'tar'.
2. Raleigh Lights and Rich Lights are not now and will not be relatively low in C.O. versus competition without major product revisions that are not forthcoming from R&D.
